ACTIVITIES BASED ON ART FROM WASTE AND PALM LEAVES

Date:20.9.2024

Name of the Programme / Title	ACTIVITIES BASED ON ART FROM WASTE AND PALM LEAVES
Department/Coordinator	Dr.G. Selvarakku
Date	20.9.2024

Report

Activities based on art from waste and palm leaves was organized by the Part V Gender Studies programme (Aided & SF) on 20.9.2024. Accompanied by faculty member Dr.G. Selvarakku, Co ordinator (Self-Finance).As part of our efforts to promote sustainable development and environmental awareness organized a hands-on activity session focusing on Palm Leaf Crafts and Art from Waste. The event aimed to encourage creativity, recycling, and resource optimization while fostering an understanding of eco-friendly practices. Participants created decorative items, baskets, and utility products from palm leaves. Students actively participated, creating their own eco-friendly crafts that showcased creativity and resourcefulness. The focus was on upcycling discarded plastic bottles, caps, and other waste materials into useful and artistic items.Students made planters, pen stands, and decorative wall hangings from used plastic bottles, learning how to give new life to waste materials.Teachers highlighted the harmful effects of plastic pollution and how such practices contribute to reducing

environmental waste. A discussion was held to reflect on how small, creative initiatives like these can significantly impact the environment and society. Participants shared their ideas for similar projects and pledged to adopt sustainable practices in their daily lives. The event was a step forward in promoting the goals of sustainable development. Activities like palm leaf crafts and art from waste serve as reminders of the power of innovation in addressing environmental challenges. Participants left inspired and committed to incorporating these practices into their lifestyles.
